Weekly Status 11/21/2021

CSCI-P465/565 (Software Engineering I)

Status for week ending 11/21/2021

Provide status for each project function, Deliverable, and/or software component under development.

****** For those teams using the more rigorous process, list the WBS elements that you worked this week, and the hours accordingly. ******

Elements of Weekly Status:

- **Project Function, Deliverable, Component Name**
- List in this column all of the activities you performed with respect to your project during this week. Activities can be anything worked on the project: a document, a deliverable, a component of your system, time with the customer, planning/scheduling meetings, etc. Please be honest when reporting your status. For example, even if you are not yet supposed to be working on design per the process, please note a design activity if you did in fact work on the design that week - honest reporting will not adversely affect your grade.
- **Responsible Person**
- Identify one (**and only one**) person on your team that is responsible for the activity that was performed. If two people worked a task, break the task up so that the contributions of each individual may be independently logged.
- **Man-Hours Worked this Week**
- Indicate the how many man-hours (round to the 0.25 hour) were spent on the activity in the following process areas:
 - Project Planning - Number of hours spent developing, documenting, and reviewing plans for the project
 - Requirements Development - Number of hours spent developing, documenting, and reviewing the customer needs
 - Design - Number of hours spent developing, documenting, and reviewing system and component design

- **Estimated Component Percent Complete**
- For each identified component, indicate the estimated completion percentage
