Weekly Status 11/14/2021
CSCI-P465/565 (Software Engineering I)

Status for week ending 11/14/2021

Provide status for each project function, Deliverable, and/or software component under development.

** For those teams using the more rigorous process, list the WBS elements that you worked this week, and the hours accordingly. **

Elements of Weekly Status:

- **Project Function, Deliverable, Component Name**
- List in this column all of the activities you performed with respect to your project during this week. Activities can be anything worked on the project: a document, a deliverable, a component of your system, time with the customer, planning/scheduling meetings, etc. Please be honest when reporting your status. For example, even if you are not yet supposed to be working on design per the process, please note a design activity if you did in fact work on the design that week - honest reporting will not adversely affect your grade.
- **Responsible Person**
- Identify one (**and only one**) person on your team that is responsible for the activity that was performed. If two people worked a task, break the task up so that the contributions of each individual may be independently logged.
- **Man-Hours Worked this Week**
- Indicate the how many man-hours (round to the 0.25 hour) were spent on the activity in the following process areas:
  - Project Planning - Number of hours spent developing, documenting, and reviewing plans for the project
  - Requirements Development - Number of hours spent developing, documenting, and reviewing the customer needs
  - Design - Number of hours spent developing, documenting, and reviewing system and component design

- o <u>Implementation</u> - Number of hours spent actually coding, peer reviews, and/or unit testing
- o <u>Test</u> - Number of hours spent planning and executing the test
- o <u>Delivery</u> - Number of hours spent packaging the product and/or developing the user manual
- o <u>Project Management</u> - Number of hours spent developing weekly status, scheduling meetings, etc
- o <u>Change Control</u> - Number of hours spent implementing and documenting changes to the baselined artefacts
- **Estimated Component Percent Complete**
- For each identified component, indicate the estimated completion percentage

Project Function, Deliverable, or Component Name	Responsible Person	Man-Hours Worked this Week								Estimated Component Percent Complete
